---

I am a highly skilled Software Engineer with professional experience since 2019 (5+ years), specializing in backend technologies. My core expertise includes working with PHP, Node.js, Python, Go and JavaScript, complemented by proficiency in other programming languages tailored to project-specific needs.

## PROFESSIONAL EXPERIENCE

---

PT.Dengan Senang Hati 2022 – 2025

### Backend Engineer

- Led engineering team to deliver high-quality software, aligning technical strategies with business goals.
- Conducted code reviews and mentorship to improve code quality and developer productivity.
- Optimized system functionality, improving performance and scalability.
- Developed and launched efficient, maintainable backend systems from scratch.
- Strengthened system security, ensuring data integrity and secure authentication.
- Improved overall code quality through in-depth code reviews and mentorship.

Wakaf Salman ITB 2023 – 2024

### Fullstack Developer

- Improved functionality and performance by enhancing and maintaining web systems.
- Optimized system performance, increasing scalability, speed, and efficiency.
- Developed client-requested features that met specified requirements and enhanced user experience.
- Translated client requirements into actionable development tasks, ensuring alignment with business needs.

Hyperdev Indonesia 2021 – 2024

### Fullstack Developer

- Developed and maintained scalable web applications in collaboration with the Hyperdev team.
- Successfully integrated third-party APIs and services to enhance project functionality.
- Maintained high coding standards through thorough code reviews and adherence to best practices.
- Translated complex business requirements into clear technical specifications and actionable tasks.

Titik Terang Teknologi 2021 – 2022

### Technical Team Lead

- Successfully translated client requirements into actionable development plans, ensuring project alignment with expectations.
- Effectively prioritized and managed backlog tasks, optimizing workflow and resource allocation.
- Provided technical leadership to resolve complex challenges, improving team efficiency and problem-solving capabilities.
- Led collaborative discussions and brainstorming sessions, fostering innovative solutions and team engagement.
- Acted as a crucial liaison between clients and the development team, successfully managing expectations and deliverables.

**Backend Developer**

- Successfully translated backlog tasks into actionable features, ensuring efficient prioritization and smooth development workflows.
- Collaborated closely with the lead developer and CTO, aligning project goals and strategies for seamless execution.
- Developed and maintained comprehensive unit tests, increasing code reliability and reducing system failures.
- Optimized database queries and backend processes, significantly improving application performance and efficiency.
- Documented APIs, workflows, and architectural decisions, improving knowledge sharing and development efficiency within the team.

---

**EDUCATION**

---

Politeknik TEDC Bandung

2016 - 2020

**D4 Informatics Engineering**

SMKN 1 Subang

2013 - 2016

**Computer Network Engineering**

---

**SKILLS**

---

**Hard Skill:** PHP, NodeJs, Python, Javascript, Typescript, Laravel, Nestjs, ExpressJs, Fastify, FastApi, VueJs, NuxtJs, NextJs, ReactJs, Docker, Redis, BullMQ, Server Development, Web Server Configuration, Websocket.

**Soft Skill:** Problem Solving, Critical thinking, Technical Documentation, Backlog Management, Technical Leadership, Requirements Analysis, Time Management, Team Collaboration.
